

HURST

SAFE VIAL TRANSPORT & STORAGE SYSTEMS

HURST vial traying systems feature a unique vial tray and tray gate design coupled with a separate lockable stainless steel tray cover. The tray cover may be used in conjunction with resilient foam padding to compress vials during transport and storage, providing additional security for tray contents.

rear view with tamper evident seal

TRAY FEATURES:

- Polycarbonate eliminates talc, resin, glass particles
- Feathered lead-in edge
- 90° inside walls accommodate small diameter vials
- Unlimited stacking
- Four gate positions
